## **ICD-10-CM Guidelines**

- Code all documented conditions that coexist at the time of the visit, and require or affect patient care treatment or management
- Do not code conditions that were previously treated and no longer exist.
   However, history codes may be used if the historical condition has an impact on current care or treatment.
- \* A dash (-) after a code indicates additional digits are required
- \* All diagnosis must be documented and supported in the medical record
- \* **GREEN** ICD-10-CM codes are new codes effective 10/1/2022
